

Title

Pratik × BARSS Ops

The Partnership & Investment Case

- Impact 480 LLC (Dan Tillias) × BARSS LLC (Wesley Bertil)
- Perpetual Delaware JV, covenantal not transactional
- Cap-Haïtien operations, Delaware legal home
- Plakèt Pay rides Mannitalks' licensed MSB rail

"Chris carries the license. Plakèt carries the product. Funders carry the ignition fuel."

The Opportunity

Haiti's domestic commerce rail is unbuilt.

- MonCash moves money between people, not commerce between merchants
- 12.75% of vendor revenue is lost to the hidden tax of cash (range 8 to 25%)
- No merchant-grade domestic digital rail exists in Cap-Haïtien
- Chris already holds the Haiti-to-Haiti tap-to-pay licensing
- 300-400 Day 1 users pre-committed via Dan's coalition

Moncash moves money. Plakèt moves commerce.

The Team

Two people, twenty-five years of ground, one framework.

- **Dan Tillias** ... 25 years SAKALA, 310 youth, 25 sites, 7 departments
- **Wesley Bertil** ... BARSS framework, 20 cases, \$8-12T documented
- **Chris Cherubin (Mannitalks)** ... licensed MSB, BRH-compliant rails
- Perpetual JV covenant... lifetime stipends, reciprocal cross-guaranty
- No exit. No dissolution clause. No drift.

"Dan and Wesley form a perpetual Delaware LLC that saves Haiti."

Why Now

Five windows opening simultaneously.

- HTG lost 62% of value since 2019... depreciation drives digital demand
- Violence premium at all-time high... cash-out infrastructure is the target
- Haitian diaspora 975K households mapped across 1,420 US ZIPs
- BRH e-money rules matured... Mannitalks already licensed
- Chris's Haiti-to-Haiti tap-to-pay license covers Phase 0 with no license lift

The rail license is already built. We just plug in.

The Product Stack

Four plays. One Plakèt-dense module. Three operational pillars.

- **Pillar 1: Trash** ... SAKALA youth, rickshaws, organic waste to biochar
- **Pillar 2: Reforestation** ... 0.5 ha bamboo Year 1, 6 revenue streams
- **Pillar 3: Charcoal** ... biochar kilns at \$0.40/kg parity, wood charcoal dies
- **Pillar 4: Plakèt** ... **Verified** (KYC), **Library** (catalog), **Pay** (USDC/HTG/Lò), **Directory** (discovery), **Payroll** (60/25/15)
- Plakèt Pay is where the fee math compounds

Five sub-modules. One rail. Zero existing competition on the commerce layer.

The Captive Coalition

300-400 Day-1 vendors before the door opens.

- **SAKALA** ... youth payroll, waste collection, 40 youth Year 1
- **SOIL** ... biochar offtake, EcoSan franchise payroll
- **HELP** ... scholarship stipend disbursement, 372 alumni
- **Pratik / Fatraka** ... Dan's waste operations
- **Konbit Lapen** ... rabbit cooperative payroll

No CAC. No cold outreach. Just turn on the rails.

The Hidden Tax of Cash

Cap-Haïtien vendors lose 12.75% of revenue to cash... Plakèt costs under 2%.

- Depreciation on float... 2.5% (gourde loses 1.7%/mo purchasing power)
- Security and violence premium... 6.0% (guards, escorts, kidnap exposure)
- Time cost... 1.5% (6-12 hours/mo on banking errands)
- Bank fees, MonCash fees, counterfeit... 2.75% combined
- Plakèt is **15 to 30x cheaper** than cash at every tier

"Cash costs you 10-25 cents on every dollar. Plakèt costs you under 2 cents. Keep the delta."

Vendor Pricing Menu

Kreyòl-first. Four tiers. Inverts the standard card-processing model.

Tier	Price/mo	Take rate	Target volume	Savings multiplier
Piyay (free)	\$0	0.5%	<\$150/mo	16x-32x
Mache	\$3	0.3%	\$150-\$2K/mo	15-22x
Biznis	\$5	0.2%	\$2K-\$5K/mo	20-27x
Plakèt Pro	\$15	0.15%	\$5K+/mo	18-24x

- One-time onboarding: \$0 pilot cohort, \$25 standard, \$40 brand-pull phase
- Plakèt absorbs hardware subsidy... recovers through Phase B onboarding fees
- Take-rate inverts small-pays-more logic... density beats margin at Piyay

Pay us under 2% of revenue. Stop losing 15%. The math writes itself.

Revenue Sharing with Mannitalks

Equitable split. Chris carries license. Plakèt carries product. Each gets what their lane earns.

Revenue stream	Plakèt share	Mannitalks share	Rationale
Transaction take (0.3-0.5%)	65%	35%	Mannitalks settlement + BRH compliance
Monthly subscription (\$3-\$15)	85%	15%	Plakèt builds & maintains product
Onboarding fee (\$0-\$40)	100%	0%	Plakèt covers hardware COGS
Lò SAKALA gold conversion	100%	0%	SAKALA International rail, firewalled
Float interest	0%	100%	Mannitalks holds settlement float
Optional ramp sweetener	—	\$500/mo minimum	Months 1-12, floor guarantee for Chris

No side of this deal bleeds. The lanes are the lanes. Everybody eats.

Chris's Upside Curve

Zero marginal effort. The license is already built. Revenue compounds against his existing rail.

- **Phase A (100 vendors)** ... ~\$1.8K/yr Mannitalks take
- **Phase B (500 vendors)** ... ~\$9K/yr
- **Phase C (2,000 vendors)** ... ~\$60K/yr
- **Phase C + US-to-Haiti payroll layered on** ... ~\$132K/yr
- \$500/mo minimum guarantee Months 1-12 = \$6K floor while Phase A ramps

"Chris doesn't build anything new. Plakèt plugs into the rail that's already live. He gets paid for carrying the license... that's the whole deal."

Funder's Upside Curve

\$50-75K Phase 0 bridge buys 36-month ignition. Phase 1 unlocks \$10-15M IFC close.

- **Phase 0 bridge (\$50-75K)** ... 36 months, 2 founders, 4 pillars lit
- **Month 9-12 break-even** ... revenue crosses operating burn, no more bridge needed
- **Year 3 unlock** ... IFC + IDB Invest + Canada BCF + K-GRID, \$10-15M blended close
- **Year 5 base case** ... \$8.58M revenue, \$4.67M EBITDA, 54% margin
- **Year 20 vision** ... \$120M+ gold reserve, Theta below 0.20 in footprint

Fifty thousand dollars buys thirty-six months of Haiti's first extraction-proof cooperative.

The Phase 0 Bridge Ask

\$50-75K breaks down line-by-line. Nothing vague.

Line item	Budget	Ignites
Rickshaws (Pillar 1)	\$12-18K	4-6 cargo rickshaws, metro routes
Biochar kilns (Pillar 3)	\$8-12K	2-3 kilns in rotation
Bamboo starter plot (Pillar 2)	\$4-6K	0.5 ha SOIL Limonade
Plakèt MVP engineering	\$10-15K	Pay + Payroll MVP, Mannitalks integration
Household bins (1-2K units)	\$6-10K	Source-separation, metro rollout
Protected supervisor stipends	\$28.8K/yr	Gilbert + Guy + Other Wesley
Legal + accounting	\$8-12K	DE filings, trust drafting, audit retainer
Ops float + contingency	\$5-10K	Working capital, 3-month fuel buffer

Every dollar is tied to a unit of physical infrastructure. Kilns, bins, rickshaws, stipends. The software earns its place after.

Validators & Coalition

Already in. Name-level credibility... not invented for the pitch.

- **Sandy Darity** (Duke → Howard 2026) ... active mentor engagement, Tullock derivation endorsed
- **Thomas Craemer** (UConn) ... WA State Reparations Report collaborator, Russell Sage co-PI
- **Ambassador Leslie Voltaire** ... Haiti government channel
- **Fadhel Kaboub** (UN-DESA Advisory) ... MMT framework alignment, email opened
- **Khalil Gibran Muhammad** (Princeton) ... NJ Reparations Council co-chair
- **Ezrah Aharone** (Center for Global Africa) ... APRM/AU bridge
- **Jean Marie Théodat** (Sorbonne) ... Director of Geography, VAE channel

The framework is validated. The defendants are named. The coalition is already real.

Risk Register

We name the risks. We do not hide them.

- **Currency collapse** ... 60/25/15 pay-split hedges HTG with USDC + L0 gold
- **Political violence** ... Cap-Haïtien baseline below PAP, no cash-out exposure
- **Regulatory shifts** ... Mannitalks holds BRH license, Plakèt is agent-of-payee
- **Digicel retaliation** ... MonCash off-ramp optional, not dependent
- **Mannitalks business failure** ... 12-month exclusivity, Unibank backup rail Phase 2
- **Chris partnership disruption** ... termination-for-cause clause, cash-reserve buffer

"Every risk we named has a named mitigation. If it's not listed, we haven't thought about it hard enough yet."

The Firewall Principle

Five legally distinct entities. No cross-contamination. Audit-ready for Chris and for funders.

- **SAKALA Community Center** ... 23-year Haitian NGO, untouchable
- **Fatraka** ... Pratik's personal waste business
- **Impact 480 LLC** ... Dan's host vehicle for JV
- **BARSS LLC** ... Wesley's research + JV counterparty (filed April 15, 2026)
- **Fon Kominote SAKALA** ... gold reserve master trust, Delaware irrevocable charitable

If one entity is attacked, the other four keep operating. That is the design.

Extraction-Proof Architecture

Why the math doesn't drift over 20 years.

- **40% Gold Reserve** ... grams not gourdes, stored offshore, LBMA-compliant vault
- **40% Salary** ... cooperative payroll, Dan lifetime stipend senior, worker patronage
- **20% Initiatives** ... reinvestment, new verticals, grant-matching pool
- **60% HTG / 25% USDC / 15% Lè** ... every worker's paycheck, three currencies
- **Fractal sub-trusts** ... one per endeavor, Delaware Trust Code §3801

Forty percent gold is not conservative. It is counter-extraction.

Phase 1 Unlock Triggers

Objective KPIs. Month 24 audit is the gate.

- **Gate 1 (M6)** ... RCL or Mayor MOU signed, 1,000 bins distributed, kiln producing
- **Gate 2 (M12)** ... 50+ tons waste processed, 3,000 households, 30+ collectors on payroll, first L0 issuance
- **Gate 3 (M24)** ... 200+ tons, 6,000 households, 300+ workers on Plakèt Payroll, feed LOI signed
- **Gate 4 (M36)** ... 435+ tons, 10,000 households, 12+ months audited data, RCL renewed
- Gate 4 triggers **\$10-15M DEFINITIVE Phase 1 close** ... IFC + IDB Invest + Canada BCF + K-GRID

Phase 1 is not a pivot. It is the reward for surviving Phase 0.

Year 20 Vision

Theta below 0.20 inside the Cap-Haïtien cooperative footprint.

- 25,000 hectares reforested, 6 revenue streams, carbon positive
- 4,000+ cooperative jobs, diaspora reverse-migration
- Plakèt = national commerce rail, Caribbean white-label unlocked
- Gold reserve above \$120M, distributed to members
- BARSS framework validated as replicable across CARICOM

The only development model where the math gets better every year.

Two Asks

One for Chris. One for funders. Both on the same page.

For Chris (Mannitalks):

- Pilot 60 days, 100 vendors, 65/35 rev share on tx
- \$500/mo minimum guarantee Months 1-12
- 12-month exclusivity as Plakèt's primary payroll rail
- Zero marginal effort... license already built

For funders:

- \$50-75K Phase 0 bridge (36-month runway, 2 co-founders)
- Warm intro to IFC Bogotá / FMO / Proparco for Phase 1
- Joint LOI co-signed by BARSS + Impact 480
- Validator endorsements already in hand

Chris gets paid for carrying the rail. Funders get the first position on extraction-proof infrastructure. Nobody's asked to believe anything... just read the math.

Close

Partner or fund. Or both. The rail runs either way.

- Wesley Bertil, BARSS LLC, Wilmington DE ... wbertil@barssforhaiti.com
- Daniel Tillias, Impact 480 LLC, Cap-Haitien ... (routed through Wesley)
- Chris Cherubin, Mannitalks ... MSB license holder, rail provider
- Perpetual partnership. No exit. No drift. Phase o ignites Month o.

"We don't need a partner to believe in us. We need a partner to plug into us."

Everything else is footnotes.

End of Chris + Funders Deck. Companion to the Mission Deck (Section 6) and the 36-Month Execution Deck.
